

# VanTran Solutions

## DID YOU KNOW ?...

**VanTran Industries transformers are helping increase energy independence.**

VanTran transformers can be found along the newly converted Pony Express Pipeline. From North Dakota and Montana down to Cushing, OK, VanTran Industries has supplied 15 transformers for pump stations along the 24" natural gas pipeline. The Pony Express Pipeline carries between 230,000 and 320,000 barrels of light crude per day from the Bakken Shale.

VanTran's transformers for this project are substation class ranging in size from 5,000kVA to 10,000kVA. Each of these transformers supplies power for up to three 3,200hp electric motors for the pumps.

**Do you need a special transformer designed and built for heavy duty application? Let VanTran build it for you!**

## VANTRAN IS...

- Manufactured in the USA from domestically sourced materials
- Located in Waco, TX, with shipments worldwide
- Established in 1963 with over 50 years in the transformer industry
- ISO 9001 Compliant
- ARRA Compliant
- UL Listed
